traackly

CUSTOMER RESEARCH & ROADMAP

Where Traackly goes next

70 simulated manufacturers, 53 of them Indian SMBs from every state, reviewed Traackly's product and screens. What resonated, what they need next, what they would pay, and the roadmap that follows.

53
Indian SMBs, all 28 states + 5 UTs

30 of 53
would take a free pilot today

7 / 10
fit in the top clusters (panels, packaging, export)

Simulated customer research · India first, then 15 countries

15 October 2026

At a glance

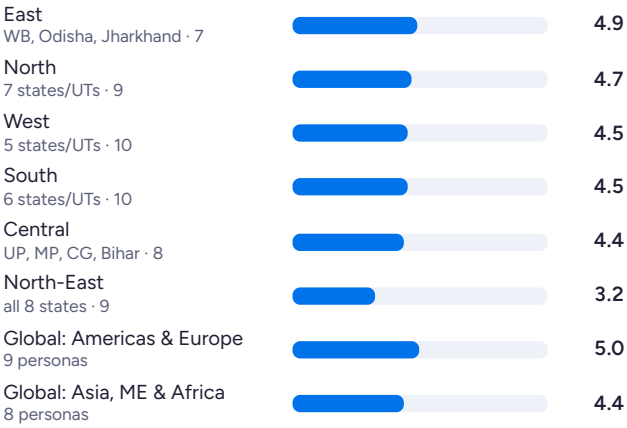

70
simulated customers
53 India · 17 global

4.3/10
average fit, India

30/53
Indian SMBs would take a free pilot (17 maybe, 6 no)

₹2.5–5k
per month for a 50–200 person plant (est.)

Average fit by region (out of 10)

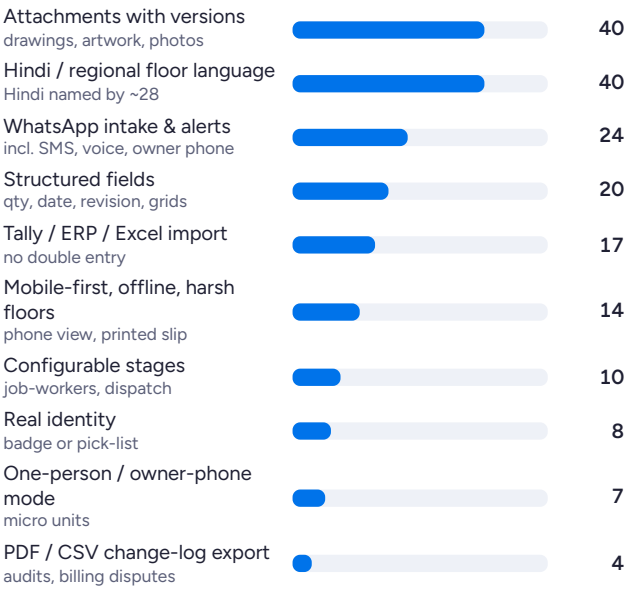

Fit by company size, India

The sweet spot is 35–300 people with a separate office and floor.

Most-requested additions, India (personas asking, of 53)

Fit by cluster, India (out of 10)

Made-to-order makers with costly misses fit best; micro, process and GMP units fit worst.

How this report was made

How this was done. 70 simulated customer personas reacted to Traackly independently: 53 Indian SMB owners, managers and floor supervisors from all 28 states and 5 union territories, and 17 manufacturers in 15 other countries. Each was grounded in a real industry cluster (Ludhiana cycle parts, Morbi ceramics, Coimbatore pumps, Howrah foundries and so on). They saw only what a prospect would see: a one-page product sheet, the screenshots and the live demo link (see the appendix). They did not see the PRD, the strategy documents or the backstory. A final pass combined the eight regional swarms into this report.

> **Read it as a stress test, not validation.** These are model-simulated personas, not real customers. Every price and frequency is a persona estimate, marked (est.). Section 15 lists how to check the key findings with real plants.

1. Executive summary

- **India: the core idea lands, and the roadmap is clear.**
  - Average fit is **4.3/10**: 17 of 53 score 6 or more, and 17 score 3 or less.
  - 30 would pilot, 17 say maybe and 6 say no.
  - Nobody argued with the core idea: if an approved order changes, the floor must acknowledge it before marking it done.
  - The next step is to meet changes where they actually travel in India: as a **photo, drawing, voice note or WhatsApp message to an owner who is also the approver**. The floor also reads **Hindi or a regional language**, not English.
- **Global: the same pain is recognised (4.7/10).** Small high-mix job shops in the UK, US, Poland, Kenya, Bangladesh and the UAE recognised the problem straight away. Regulated plants, ERP-mature plants and China don't need it or can't use it.
- **Roadmap #1: file and photo attachments with versions, shown in the change diff.** 40 of 53 Indian personas and 14 of 17 global ones asked for this. It is the must-have for 15 of the 17 best-fit Indian personas.
- **Roadmap #2: a Hindi floor screen.** 40 of 53 want a local language on the floor, and about 28 named Hindi specifically. That includes personas in Tamil Nadu, Maharashtra, Bengal and the North-East, because migrant labour is everywhere.
- **Roadmap #3: WhatsApp in and out (24 of 53).** It should take changes from WhatsApp and send alerts to WhatsApp, not compete with it.
- **Best-fit customer:** a **35–300 person** made-to-order or engineer-to-order maker with a separate office and floor, ideally in different cities, where one missed revision scraps a roll, batch or container. In order of fit:
  - LT control-panel builders (7.0)
  - flexible and pharma packaging (6.5)
  - export leather, saddlery, furniture and sports goods (~6.2)
- **Not the first focus:** businesses under 30 people (average 2.5), process plants, GMP pharma, home-artisan networks and WhatsApp trader markets.
- **Price:** about **₹2,500–5,000 a month (est.) for a 50–200 person plant**. Buyers expect a flat per-plant fee paid **annually upfront with a GST invoice, like a Tally renewal**, after a free pilot set up on site. The median for best-fit personas is ₹4k a month.

2. India scoreboard by region

Region	States/UTs	Personas	Avg fit	Best fit	Worst fit	Floor languages	Price band (est.)
North	Punjab, Haryana, HP, Uttarakhand, Delhi NCR, Chandigarh, J&K	9	4.67	Karan Bedi, LT panels, Chandigarh (7)	Bawana laser job-work, J&K pashmina (2)	Hindi, Punjabi, Urdu	₹1-6k; ₹8-15k for compliance plants with attachments + ERP
West	Gujarat, Maharashtra, Rajasthan, Goa, DNH&DD	10	4.50	Neha Jain, flexible packaging, Silvassa (7)	Surat embroidery, Goa pharma (2)	Hindi, Gujarati, Marathi, Odia	₹1.5-6k; Chakan auto ₹8-12k with ERP
South	TN, Karnataka, Telangana, AP, Kerala, Puducherry	10	4.50	Karthikeyan, LT panels, Puducherry (7)	Hyderabad pharma, Kochi rubber (2)	Tamil, Telugu, Kannada, Malayalam, Marathi + Hindi/Bengali/Odia	₹2-3k typical
Central	UP, MP, Chhattisgarh, Bihar	8	4.38	Noida garments, Kanpur saddlery (6)	Aligarh locks (2)	Hindi	₹1.5-4k; ₹5-10k for 200+ with ERP

Region	States/UTs	Personas	Avg fit	Best fit	Worst fit	Floor languages	Price band (est.)
East	WB, Odisha, Jharkhand	7	4.86	Farhan Qureshi, export leather, Kolkata (7)	Bhubaneswar CNC (2)	Hindi, Bengali, Odia, Urdu	₹1-4k
North-East	All 8 states	9	3.22	Dipankar Kalita, fabrication, Guwahati (6)	Ziro fruit squash (1)	Assamese, Bengali, Hindi, Nagamese, Manipuri, Sadri	~₹1k; 5 of 9 pay nothing
India	28 states + 5 UTs	**53**	**4.34**				Median ₹2.5k; best-fit median ₹4k

3. India state by state

Region	State/UT	Persona	Fit	Pilot	Price/mo (est.)	Reason
North	Punjab	Gurpreet Gill, freewheels/hubs, Ludhiana, ~45	4	Maybe	₹1-1.5k	Owner changes orders himself by phone; floor doesn't read English
North	Punjab	Arjun Mahajan, sports-gear export, Jalandhar, ~180	6	Y	₹4-6k	Sampling-to-bulk pain; changes are artwork + size/colour splits
North	Haryana	Rakesh Yadav, Tier-2 pressings, Manesar, ~260	6	Y	₹8-15k w/ ERP	Auditor would like it; won't double-enter beside ERP
North	Haryana	Sunil Jain, home furnishings export, Panipat, ~140 + job-workers	5	Y	₹2-3k	Fixed 3 departments ≠ dyeing→weaving→job-work→packing
North	Himachal	Neha Thakur, pharma cartons/labels, Baddi, ~110	6	Y	₹10-12k	Wrong carton text = recall; needs version-locked artwork + PDF log
North	Uttarakhand	Mohan Bisht, moulding supervisor, Pantnagar, ~300	4	Maybe	₹3-5k	Churn is qty/priority 3-4×/day; greasy hands won't type
North	Delhi NCR	Vinod Aggarwal, laser job-work, Bawana, ~18	2	Maybe	≤₹500	One person in every role; WhatsApp is free
North	Chandigarh	Karan Bedi, LT control panels, ~35	7	Y	₹3-5k	"This fits us"; only missing SLD/drawing attachment
North	J&K	Showkat Mir, pashmina/carpet export, ~25 + 200 artisans	2	N	—	Floor is artisans' homes; internet off for days
West	Gujarat	Hitesh Vaghasiya, CNC turned parts, Rajkot, ~45	6	Y	≤₹1.5k	"Without drawing just a notice board"; English-only
West	Gujarat	Ketan Kundariya, vitrified tiles, Morbi, ~280	4	Maybe	₹3-5k	Process industry; only packing/dispatch fits
West	Gujarat	Jignesh Desai, embroidery job-work, Surat, ~60	2	N	≤₹500	Runs on photos + voice notes; approval slows the trader
West	Maharashtra	Sachin Kulkarni, Tier-2 pressing, Chakan, ~220	5	Y	₹8-12k w/ ERP	ECN + ERP exist; real pain is schedule/qty changes
West	Maharashtra	Shrikant Patil, castings, Kolhapur, ~90	3	Maybe	₹1-1.5k	Dust/heat; moulders won't touch screens; wants printed slip
West	Maharashtra	Imran Ansari, garment job-work supervisor, Bhiwandi, ~40	4	Y	≤₹500	Wants proof of when a change came; needs Hindi + photos
West	Rajasthan	Amit Agarwal, rubber/plastic moulding for 2W, Bhiwadi, ~150	6	Y	₹4-6k	"Kal 2,000 nahi 3,500 bhejo" (send 3,500 tomorrow, not 2,000); needs qty/date fields
West	Rajasthan	Rohit Bhandari, furniture export, Jodhpur, ~120	6	Y	₹3-5k (in season)	"Sabse bada dard" (our biggest pain); 40 SKUs in one text box, no photos
West	Goa	Savio Fernandes, contract pharma, Verna, ~180	2	Maybe (order desk)	—	Shared tablet + typed name fails GMP

Region	State/UT	Persona	Fit	Pilot	Price/mo (est.)	Reason
West	DNH&DD	Neha Jain, flexible packaging, Silvassa (office Mumbai), ~85	7	Y	₹5-8k	Locked Mark done is exactly the Mumbai→plant check
South	Tamil Nadu	Senthil Kumar, pumps/motors, Coimbatore, ~120	6	Y	₹2-2.5k	40 pumps shipped with wrong nameplate; orders come on WhatsApp
South	Tamil Nadu	Kavitha B., knitwear export, Tiruppur, ~450 + job-workers	4	Maybe	₹5k if job-workers covered	Too coarse for size-colour grids; pain is at the outside dyeing unit
South	Tamil Nadu	Murugesan P., Tier-2 auto supervisor, Hosur, ~180	6	Y	₹3-5k after ERP	Old-revision drawing at the machine; typed name not OK for IATF
South	Karnataka	Raghavendra Rao, CNC job shop, Peenya, ~35	3	Maybe	≤₹1k	"Swalpa overkill" (a bit overkill); he holds all three roles
South	Karnataka	Aditya Kulkarni, foundry, Belagavi, ~220	5	Y	₹4-6k	Needs custom stages + ERP link
South	Telangana	Dr. Srinivas Reddy, contract pharma, Jeedimetla, ~150	2	Maybe (non-GMP)	—	Fails ALCOA+/Part 11 data integrity
South	Telangana	Venkatesh Goud, AS9100 aerospace machining, ~60	4	Maybe (on-prem)	₹1-1.5 lakh one-time	Likes audit trail; customer forbids cloud
South	Andhra Pradesh	Suresh Babu, fabrication, Vizag, ~80	6	Y	₹2.5k	Half the changes are sketch photos; needs a "Breakdown" priority
South	Kerala	Joseph Mathew, moulded rubber, Kochi, ~18	2	N	—	Irrelevant at this scale
South	Puducherry	Karthikeyan S., LT panels, ~90	7	Y	₹2-3k	"My exact pain"; needs GA drawing with revision + email→request
Central	UP	Rakesh Agarwal, garment export, Noida, ~400	6	Y	₹6-8k w/ ERP	"Half my rejections are old label"; needs tech pack + PO import
Central	UP	Imran Qureshi, saddlery export, Kanpur, ~80	6	Y	₹3-4k	Thread-colour change needs a swatch photo + Hindi
Central	UP	Satish Varshney, padlocks, Aligarh, ~25 + platers	2	Maybe	≤₹500	Half the process is with outside job workers
Central	UP	Ramesh Pal, sports-goods supervisor, Meerut, ~120	3	Maybe (owner decides)	—	Yellow flag works; long English text hides "40→42"
Central	MP	Vivek Joshi, auto components, Pithampur, ~220	5	Y	₹5-10k w/ ERP	A second system beside the ERP; informal changes are the gap
Central	MP	Anil Tiwari, fabrication job shop, Mandideep, ~45	5	Y	₹2-3k	"My requirement is a drawing, not a sentence"
Central	Chhattisgarh	Manoj Sahu, structural fabrication, Raipur, ~90	5	Y	₹1.5-2.5k	A TV won't survive sparks; half the work is at client sites
Central	Bihar	Ritesh Kumar, makhana packing, Hajipur, ~60	3	Maybe	₹500-1k	Power cuts, no Hindi; changes are rare
East	West Bengal	Subrata Pal, castings/railway parts, Howrah, ~85	5	Y (office)	≤₹1.5k	The foreman is the screen; railway changes are formal letters
East	West Bengal	Farhan Qureshi, export leather, Bantala, ~220	7	Y	₹4-6k	"Leather is visual"; needs image + style/colourway fields
East	West Bengal	Anirban Chatterjee, machine-shop supervisor, Durgapur, ~45	5	Y (if owner agrees)	~₹1k	Orders start as the owner's 11pm call
East	Odisha	Prasanta Sahu, fabrication/shutdown contractor, Jharsuguda, ~150	5	Maybe	₹2-3k	Wants the log to win billing disputes; work is at client sites
East	Odisha	Bijay Mohanty, CNC job shop, Bhubaneswar, ~14	2	N	—	"All three roles are me"
East	Jharkhand	Ritika Agarwal, Tier-2 pressings, Adityapur, ~300	6	Y	₹8-12k w/ ERP	Wants a "lite ECN" for WhatsApp schedule changes

Region	State/UT	Persona	Fit	Pilot	Price/mo (est.)	Reason
East	Jharkhand	Sanjay Mahato, heavy fabrication for PSUs, Ranchi, ~60	4	Y (with setup)	₹1.5-2.5k	Changes are pen marks on drawings
NE	Assam	Dipankar Kalita, structural fabrication, Guwahati, ~28	6	Y	₹1-1.5k	Needs drawing/photo + WhatsApp alert to the supervisor
NE	Assam	Rupjyoti Gogoi, tea factory, Dibrugarh, ~120	4	Y (packing)	₹1.5-2.5k	Runs on lots/grades, not requests
NE	Meghalaya	Wanphrang Nongrum, ferro-silicon, Byrnihat, ~150	2	Maybe (dispatch)	—	"The furnace doesn't read tickets"
NE	Tripura	Partha Bhowmik, rubber products, ~35	5	Y	₹500-800	Needs Bengali, batch fields, SMS during power cuts
NE	Manipur	Thoibi Devi, handloom, Imphal, 12 looms + 40 home weavers	2	N	—	Home weavers; months-long internet shutdowns
NE	Mizoram	Lalrinfela Hnamte, chilli/ginger, Aizawl, ~15	2	Maybe	≤₹300	Too much process for one room
NE	Nagaland	Vikato Zhimomi, steel fabrication, Dimapur, ~18	4	Y	₹500-1k	Likes the log for contractor disputes; fitters need Hindi
NE	Arunachal	Tage Rinya, fruit squash, Ziro, 9	1	N	—	Irrelevant; no signal
NE	Sikkim	Karma Bhutia, contract pharma, ~200	3	Maybe (non-GMP)	—	No validation or e-signature

4. Who Traackly fits in India

Fit by size (average fit):

Size	Personas	Avg fit
Under 30	10	2.5
30–99	19	4.8
100–249	18	4.7
250+	6	5.0, but only with an ERP link

The pattern behind the best fits:

- **Size:** 35–300 people, with an order desk or merchandiser and a floor supervisor who aren't the owner.
- **Order type:** made-to-order or engineer-to-order, with jobs that run for days or weeks.
- **Where changes come from:** an external client or foreign buyer revises the spec, artwork or schedule after approval.
- **Office-floor distance:** the pull is strongest when the office and plant are in different cities.

Top clusters:

1. **LT control panels (7.0).** Karan, Chandigarh: *"Honestly, this fits us… that's the argument I have with my wiring foreman every month."* Karthikeyan, Puducherry: *"If wiring team must acknowledge before 'done', the blame game stops."*
2. **Flexible and pharma packaging (6.5).** Neha Jain, Silvassa: *"Wrong artwork = whole roll scrap, lakhs gone."* Neha Thakur, Baddi: *"Pharma-style thinking, achha laga"* (I liked it).
3. **Export leather, saddlery, furniture and sports goods (~6.2).**
   - Rohit: *"Yeh hamara sabse bada dard hai"* (this is our biggest pain).
   - Imran: *"Thread colour badalta hai, aur stitching wale ko pata nahi chalta"* (the thread colour changes and the stitchers never find out).
4. **Export garments with in-house production (Noida, 6).** *"Half my rejections are 'old label lag gaya'"* (the old label got stitched on). Job-worker-heavy garment units fit worse.

5. **Pumps and precision turned parts (6).** Senthil: *"40 pumps went out with wrong nameplate because the chit was not updated."*
6. **Tier-2 auto, for informal schedule changes (Bhiwadi, Manesar, Hosur, Adityapur: 6).** Ritika: a *"lite ECN for shop floor."* Amit: *"Shift supervisors always swear they never got the message."*
7. **Drawing-based fabrication (~5–6).** Dipankar, Suresh, Anil, Manoj. *"My requirement is a drawing, not a sentence."*
8. **Contractor fabrication with billing disputes.** Prasanta (payments held 60–120 days, est.) and Vikato: the log is the proof.
9. **Foundries, machining side only (~4–5).**

5. Who to serve later, and why

- **Micro units where the owner is on the floor (under 30 people, average 2.5).**
  - Vinod: *"Order desk bhi main, approver bhi main… Yeh bade logon ke liye hai"* (I'm the order desk and the approver… this is for big companies).
  - Raghavendra: *"Who will I acknowledge to, myself?"*
- **Process industries (3.25).** Morbi tiles (*"Amaru kaam order-wise nathi chaltu"*, our work doesn't run order-wise), ferro-silicon (*"the furnace doesn't read tickets"*), tea and makhana. At best, only packing or dispatch fits.
- **GMP pharma (2.3).**
  - *"An auditor will write a 483 on that."*
  - *"Your before/after view is nicer than our change-control form… inspector would tear that apart."*
  - Defence also needs on-prem hosting.
- **Home-artisan networks.** *"Hamara floor ghar mein hai, janaab"* (our floor is in people's homes, sir). Internet shutdowns make this worse.
- **WhatsApp trader markets (Surat).** *"Amaru badhu photo par chale chhe"* (everything here runs on photos).
- **PSU and railway work with formal amendments.** Changes come as letters, and the real pain is private customers' phone calls.
- **High-volume shops where changes are quantity and priority, several times a day.** The free-text card doesn't model this.

6. What Indian SMBs loved

- **The yellow CHANGED flag.** Ramesh (class-8 supervisor): *"Pila dabba dikha toh samajh gaya kuch badla hai"* (I saw the yellow box and understood something changed). It's the most language-proof element on screen.
- **"Mark done" locked until acknowledged.** Neha Jain called it the exact check between her Mumbai office and her plant. Karthikeyan: *"The blame game stops."*
- **The strike-through diff.** Even pharma personas preferred it to their own change-control form. One caveat: *"Bas jo badla wahi dikhao"* (just show what changed). Highlight only the changed word or number.
- **The permanent log as proof.**
  - For disputes: *"I'd finally have proof of when a change came"* (Imran Ansari), contractor billing (Prasanta), contractor disputes (Vikato).
  - For audits: *"IATF auditor ko yeh achha lagega"* (an IATF auditor will like this).
- **Office-to-plant across cities.** Mumbai→Silvassa, Delhi→Bhiwadi, and pre-press→press.

7. The 10 most-requested additions for India (ranked)

Approximate count out of 53 Indian personas.

#	Gap	Raised by	Fix	Most affected
1	**Attachments with versions** (drawing, SLD, artwork, tech pack, sketch photo)	~40	Photo/PDF per request; a new version triggers the CHANGED flag; diff shows old/new file with revision number	All regions
2	**Hindi/regional floor language**	~40	Hindi kiosk first; icons, colours, big numbers; codes stay English	West, North
3	**WhatsApp intake and alerts** (incl. SMS, voice, owner-phone entry)	~24	Alert link to supervisor or job worker; forward a WhatsApp message to create or change a request	South, NE, North, West
4	**Structured fields** (qty, date, part number, revision, job/cylinder number, style/colourway, size-colour grid, line items, lot/batch)	~20	Qty + due date as flagged fields first; then line items and grids	West, Central
5	**Tally/ERP/Excel/email import**	~17	CSV import, email→request, then Tally export; ERP later	All 200+ plants
6	**Mobile-first, offline, harsh floors**	~14	Supervisor-phone view, offline queue, printed job slip with barcode	Central, NE, East
7	**Configurable stages** (outside job workers, dispatch, custom priority)	~10	Editable stage list, Dispatch/Packing, job-worker link, "Breakdown" priority	North, South
8	**Real identity** (badge or pick-list instead of typed names; e-signature for compliance)	~8	Pick-from-list or numeric badge; barcode scan	Haryana, TN, UP, Uttarakhand
9	**One-person / owner-phone mode**	~7	Collapse roles; create a job from the phone in under a minute	Micro units
10	**PDF/CSV export of the change log**	~4	Per-job export for auditors and bills	Baddi, Odisha, Nagaland, Jharkhand

Compliance (GMP, e-signature, on-prem) is a **separate segment** of 4–5 personas, so treat it as a later edition.

8. Language map for Indian floors

- **Hindi (~28 named it)** is needed everywhere. It's the migrant link language even in Tiruppur, Hosur, Kochi, Surat, Morbi, Howrah and Dimapur.
- **Tamil:** Coimbatore, Hosur, Puducherry. **Marathi:** Chakan, Kolhapur, Belagavi. **Bengali:** Howrah, Durgapur, Tripura, and migrants in Kochi. **Gujarati:** Rajkot, Morbi, Surat. **Odia:** Surat, Tiruppur, Odisha. **Punjabi:** Ludhiana. **Urdu:** J&K, Kolkata leather. **Telugu:** Vizag. **Kannada:** Belagavi. **NE:** Assamese, Manipuri, Sadri, Nagamese.
- **Recommended rollout:**
  1. **Hindi.** Covers about half of all personas and almost every strong-fit cluster.
  2. **Tamil.** Two 7s and two 6s.
  3. **Marathi.**
  4. **Bengali.** Also covers Bangladesh.
  5. **Gujarati.**
  6. Telugu, Kannada, Punjabi, Odia, Assamese.
- **Design rule:** icons, colour and big numbers matter more than translation. Highlight only the changed token ("40→42").

9. Devices, connectivity and floor reality

- **Supervisors' own phones** are the real floor device: *"Phone pe chale toh baat bane"* (it only works if it runs on a phone). After that come cheap Android tablets (₹8–15k, est.) and an existing LED TV with an Android stick. A 32–43" TV or tablet only survives in clean areas such as panels, packaging and leather.
- **Harsh floors** (foundries, welding, moulding) have dust, heat, sparks, oil and gloves: *"Foundry madhe TV?"* (a TV in a foundry?) and *"TV won't last a month."* They need enclosures, or a **printed job slip with a barcode**.

- **Identity:** *"greasy hands won't type name."* Use a badge, barcode or pick-list. Some plants don't have scanners at all.
- **Connectivity:**
  - inverter backup and phone hotspots
  - patchy 4G and power cuts (Bihar, NE, Tripura)
  - state internet shutdowns lasting days (J&K) or months (Manipur 2023)
  - client-site work with no fixed floor (Raipur, Jharsuguda)
- **What this means:** a phone view, an offline queue and an SMS/WhatsApp fallback matter more than the TV.

10. Pricing and payment in India

Segment	Price band (est.)
Micro (<30)	₹0-1k, mostly nothing
Small (30-99)	₹1-3k
Mid (100-250)	₹3-6k
250+ with ERP link	₹8-15k
Compliance printing (pharma cartons)	₹10-12k, only with attachments + audit export
Defence on-prem	₹1-1.5 lakh one-time

South India runs lower (₹2–3k typical) than West or North for similar plants.

What buyers expect:

- A **flat fee per plant**. Per-user pricing is disliked.
- **Annual upfront with a GST invoice, like a Tally renewal**, paid by NEFT/UPI. Some prefer monthly UPI autopay.
- **Seasonal billing** for exporters and for the North-East's seasonal cash cycle.
- **A free 2–3 month pilot, set up on site.** Nobody pays before the pilot proves itself.

Recommended price ladder (derived from the answers above):

Tier	For	Includes	Price (est.)
Starter	1 plant, 30–60 people	1 floor screen + phones, attachments, Hindi, WhatsApp alert link	₹1,250/mo or ₹12,000/yr + GST
Plant	60–250 people	Unlimited screens, 2 languages, qty/date fields, job-worker links, PDF log export, badge entry	₹3,500/mo or ₹36,000/yr (~₹3k/mo)
Plant+ERP	200–400 people, IATF-type	Excel/ERP import, shift view, audit pack, multiple lines	₹9,000/mo (₹8–12k band), annual

- **Add-on:** an export-season pass, 6 months at the Plant monthly price.
- **Not yet:** a micro tier below ₹500.

11. Global view (17 personas)

Country	Persona	Fit	Price (local, est.)	Top objection
UK	Gareth Price, aerospace/motorsport CNC, 45	7	£100-200, direct debit	No drawing revision; anyone can type a name
US	Dale Kowalczyk, sheet-metal job shop, 38	6	$150-250	Double typing beside JobBOSS; "guys build from the print"
US	Rosa Delgado, 2nd-shift supervisor	6	(owner decides)	Typing with gloves; welders read Spanish
Poland	Tomasz Wiśniewski, welded frames, 160	6	PLN 600-1,200, KSeF	English-only; no Comarch link
Kenya	Wanjiru Kamau, flexible packaging, 90	6	KES 5-8k, M-Pesa	Every WhatsApp change copied by hand

Country	Persona	Fit	Price (local, est.)	Top objection
Bangladesh	Rafiqul Islam, trims/labels, 220	6	৳4-6k, bKash	Floor reads Bangla; no artwork versioning
Brazil	Marcos Bertolini, metal parts, 65	5	R$300-600, Pix/boleto	Duplicates Protheus; no Portuguese or WhatsApp
Italy	Giovanni Zanon, custom furniture, 30	5	€50-120, SDI	English-only, no photos
UAE	Rajesh Menon, skids/structural steel, 140	5	AED 750-1,500/site	Free text can't describe a skid change
South Africa	Pieter van Wyk, Tier-2 pressings, 200	5	R2.5-5k, EFT	No Syspro link; runs parallel to ECN
Mexico	Alejandro Garza, Tier-2 stampings, 210	4	MXN 3-6k, CFDI	No Spanish or WhatsApp; IATF covers formal changes
Vietnam	Nguyễn Thị Lan, injection moulding, 180	4	₫1.5-2.5M	Zalo already reaches everyone
Thailand	Somchai Wattanakul, stamping, 250	4	฿2-3.5k	Duplicates SAP B1 + ECN; LINE does the rest
Germany	Dr. Katrin Hölzl, special machines, 120	3	€150-400	Changes are at BOM level; works council; no EU hosting
US	Priya Raman, medical/aero contract manufacturer, 140	3	$800-1,500 only if validated	Part 11; existing QMS + ERP cover it
Japan	Takahashi Kenji, CNC precision, 28	3	¥10-15k	No Japanese, no drawings, no track record
China	Chen Wei, sheet-metal/cable, 260	2	≤¥300-500 or no	DingTalk/Feishu do it free; overseas hosting is blocked

Averages: 4.71 globally. Americas & Europe 5.0; Asia, Middle East & Africa 4.38.

What transfers from India:

- The same enthusiasm for the lock and diff.
- The same #1 gap: attachments with revisions (14/17).
- Local language (13/17) and chat apps (8/17).
- The same best fit: small, informal, export-facing job shops.
- Several personas read the Indian demo data as "an Indian-market product."

Best markets after India:

1. **Bangladesh.** Bengali work transfers, plus artwork versioning, a size-colour grid and bKash.
2. **Kenya.** English already works. Needs WhatsApp, offline Android and an M-Pesa Paybill.
3. **UAE.** Hindi/Urdu labels transfer. Needs drawing revisions, a variation/cost field, multiple yards and AED invoices.
4. **UK/US job shops.** Highest prices. Need revisioned attachments, badge scan, CSV import/export, and Spanish for US floors.
5. **Poland.** Polish, EU hosting with a DPA, KSeF invoices and a Comarch link.

Brazil and Mexico come later. Avoid China, Germany, regulated US plants, and IATF-heavy plants in Thailand and South Africa.

12. India vs global

The same everywhere:

- Changes arrive as a **file through a chat app** (WhatsApp, Zalo, LINE, DingTalk).
- Attachments with revisions are the first must-have.
- The floor isn't English-speaking, except in the UK, Kenya, South Africa and with some UAE supervisors.
- Double entry beside an ERP kills adoption at 200+ person plants.
- A typed name isn't trusted as identity.
- A flat fee per site is preferred.
- At IATF plants, formal ECNs are already covered, so only informal changes are left.
- Everyone liked the lock, the diff and the log.

India-specific:

- Hindi works as a migrant link language even inside non-Hindi states.
- The owner is also the approver and takes changes by phone at 11pm.
- Tally rather than an ERP.
- Annual, GST-invoiced upfront payment, plus seasonal cash.
- Outside job workers carry half the process.
- Power cuts and internet shutdowns.
- Formal amendments from PSUs.
- Very low willingness to pay below 30 people.

Global-specific:

- National e-invoicing (SDI, KSeF, CFDI, NF-e).
- GDPR and works councils, ITAR/Part 11.
- Glove-friendly UI.
- China hosting.
- In Japan, deals come through peer introductions.

---

13. Recommended roadmap from this feedback

Now (1–2 weeks), aimed at the 17 Indian personas scoring 6–7:

- Photo/PDF attachment per request, with versioning shown in the CHANGED diff (~40 India, 14 global).
- Hindi kiosk screen with icons and big numbers, highlighting only the changed word (~40).
- A "share to WhatsApp" alert link on each job, as a stopgap (~24).
- Pick-from-list or numeric badge entry instead of typing a name (~8).
- Editable department names, plus Dispatch/Packing (~10).
- Qty and due date as separate flagged fields (the core of the ~20 asking for structured fields).
- CSV/PDF export of each job's change log.

This covers most must-haves for Karan, Neha Jain, Imran Qureshi, Anil, Dipankar, Hitesh, Vikato, Farhan, Rohit and Amit. That opens LT panels, packaging, export leather/saddlery and fabrication.

Next (1–2 months):

- WhatsApp Business alerts, forward-to-request intake, and email→request.
- Excel/CSV import plus Tally export (opens Tier-2 auto).
- A mobile-first supervisor view with an offline queue, a printed job slip with barcode, and barcode acknowledgment (opens harsh floors and client-site fabrication).
- Tamil, Marathi, Bengali and Gujarati.
- Line items, size-colour grids and style/colourway fields (opens garments, sports goods, furniture and Bangladesh).
- An external job-worker phone link and custom stages.
- A one-person mode and custom priorities such as "Breakdown".

Later:

- ERP connectors (Zoho, SAP B1, garment ERPs; JobBOSS and Syspro abroad).
- A customer-facing status link.
- Voice-note intake.
- Multiple plants or yards.
- A variation/cost field.
- Global localisation.
- A compliance edition: individual logins, e-signatures, a validation pack, and India or on-prem hosting.

Not yet:

- GMP/Part 11 validation or on-prem hosting.
- China hosting or DingTalk.
- BOM/PDM-level change control.
- Process-industry batch or kiln scheduling.
- An offline artisan app.
- Machine or mould scheduling (MES creep).
- Per-user pricing.
- A micro tier below ₹500.

14. Recommended first pilots in India

1. **LT control-panel builder, Chandigarh Phase II or Puducherry (35–90 people).** Two of the four 7s. Changes come as revised SLD/GA drawings.
   - **Build first:** PDF attachment with revision number, plus a WhatsApp alert to the foreman.
   - **Puducherry also needs:** Tamil and email→request.
2. **Flexible packaging, Silvassa, with the office in Mumbai (~85 people).** Rated 7: "would try straight away," at ₹5–8k (est.). One missed artwork scraps a roll.
   - **Build first:** versioned artwork PDF, a Hindi floor screen, a job/cylinder number field, and a WhatsApp alert to the plant head.
   - **Follow-on:** Baddi pharma cartons.
3. **Tier-2 auto for two-wheeler OEMs: Bhiwadi, then Manesar, Hosur or Adityapur (150–300 people).** Four 6s. Position it as a **lite ECN for informal qty/date changes** made after the plan is frozen.
   - **Build first:** qty/date fields, a drawing revision field, Hindi (Tamil for Hosur), badge entry, a shift view and Excel import.
   - **Pilot on one line** so no IT approval is needed.
4. **Export furniture in Jodhpur, or leather/saddlery in Kanpur or Bantala (80–220 people).** Fit 6–7. Buyers send late visual changes.
   - **Build first:** photos, Hindi/Urdu, then line items per SKU or style/colourway fields.
   - **Pricing:** offer a season pass.
5. **Drawing-based fabrication, Guwahati or Vizag (28–80 people).** Fit 6. Half the changes arrive as sketch photos, and the log helps in contractor disputes.
   - **Build first:** photo attachments, a phone-first view, a WhatsApp alert to the site engineer, a "Breakdown" priority, and PDF log export.

15. Caveats: validate these with real plants

These are **simulated personas, not real customers**. The product sheet also told them what's missing (no WhatsApp, no attachments, no Tally, English only), which may have inflated how often those gaps were raised.

Finding	Cheap way to validate
Attachments + Hindi turn interest into daily use	A 4-week concierge pilot in 3 strong-fit plants (panels, packaging, Bhiwadi auto). Measure the share of changes logged in Traackly vs WhatsApp, and time to acknowledge.
Changes really start on WhatsApp/phone to the owner	A 2-week "change diary" at 5 plants: the supervisor tallies every change by channel.
Floors use shared screens (vs phones and printed slips)	Put a ₹10–15k tablet and a phone link on 3 floors, including one harsh floor. Compare opens and acknowledgments.
₹3–5k/month for a 60–250 person plant, paid annually upfront	After the pilot, offer a founding-customer annual plan at ₹36,000 + GST with a refund clause. Count signatures, not verbal yeses.
Hindi first, and icons beat text	Ship a language toggle and log usage. Run a 10-second "what changed?" test with floor workers on Hindi, Tamil and icon-only cards.

Also worth testing: whether ERP-mature Tier-2 plants keep a parallel tool for informal changes. Ask 3 plant heads to commit one line for one month.

Appendix A: what the personas were shown

This is the full brief every persona received. They saw nothing else about the product.

This is everything you know about the product: what a factory owner or manager would learn from the website, a demo and a short sales conversation. You have NOT seen any internal documents.

The pitch (from the website)

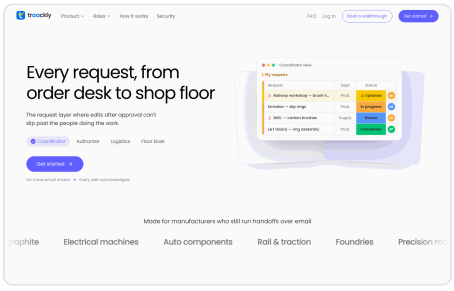

"Every request, from order desk to shop floor." Traackly is a request tracker for manufacturing companies. A client order goes through one live board instead of email threads and phone calls. If anyone changes the order after it has been approved, the people working on it next must acknowledge the change before they can finish the job.

How it works

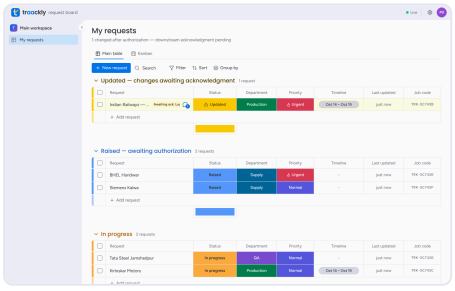

1. Order desk (Coordinator) enters a client request: client name, requirement details (free text), department (Production / Supply / QA) and priority (Normal / Urgent).
2. The owner or approver (Authorizer) approves it, edits it, or declines it with a reason.
3. Logistics sets an expected completion date. The job then appears on that department's floor screen.
4. The floor uses one shared screen (a tablet or TV) per department. No individual logins: the person types their name or badge number. Each job card shows the details and a barcode.
5. If the approver edits an approved order, it turns "Updated" (yellow). Logistics and the floor see the old text struck out and the new text in green. "Mark done" stays locked until they tap "Acknowledge change". Every change is saved permanently: who changed what, when.

Practical facts

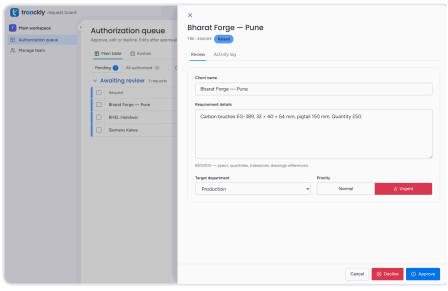

- Runs in a web browser: office PCs, phones, and a tablet or TV on the shop floor. Cloud hosted.
- Language: English only right now.
- Boards update live, without refreshing. The floor screen keeps working through short internet drops.
- No connection to Tally, SAP or any ERP yet. No WhatsApp integration yet. No file or drawing attachments yet.
- New product, no customers yet. Free pilot offered. Price not decided: they ask what you would pay.
- Live demo, no sign-up: https://traackly-demo.onrender.com (pick a role, change an order, watch the floor get flagged).

Appendix B: regional swarm notes

Below are the persona-level notes from each of the eight swarms, condensed. They are the evidence behind every table above.

India North (Punjab, Haryana, HP, Uttarakhand, Delhi NCR, Chandigarh, J&K) — 9 personas

State	Persona	Fit	Pilot / pay per month	Top objection	Must-have
Punjab	Gurpreet Singh Gill, owner freewheels/hubs, Ludhiana, ~45	4	Pilot only if set up on site; ₹1-1.5k annual GST	He changes orders himself on the phone; product assumes a desk	Punjabi/Hindi floor, WhatsApp alerts, photo attachments
Punjab	Arjun Mahajan, 2nd-gen MD sports gear export, Jalandhar, ~180	6	Yes; ₹4-6k once attachments exist	Changes are artwork not text; no size/colour qty breakdown	Versioned artwork attachments, buyer email → request, Hindi floor
Haryana	Rakesh Yadav, prod mgr Tier-2 pressings/weld assemblies, IMT Manesar, ~260	6	Pilot one line; ₹8-15k only with ERP link	Third system next to ERP + customer portals; double entry; ECN = drawing rev A→B	Drawing rev attachments, ERP/Excel import, part no. + rev fields, Hindi
Haryana	Sunil Jain, home-furnishings exporter, Panipat, ~140 + 15 job-workers	5	Yes if job-workers see jobs on phone; ₹2-3k	Fixed Production/Supply/QA ≠ dyeing→weaving→finishing→job-work→packing; shade change needs photo	Custom stages incl. outside job-workers, photo/shade-card attachments, Hindi, WhatsApp link per job
HP	Neha Thakur, plant head pharma cartons/labels, Baddi, ~110	6	Yes pre-press→press handover; ₹10-12k with attachments + audit export, else nothing	Wrong carton text = client recall; free text won't do; need approved artwork version-locked + client sign-off	Versioned artwork, PDF export of activity log, Hindi
Uttarakhand	Mohan Singh Bisht, moulding floor supervisor, SIDCUL Pantnagar, ~300	4	If HO approves; guess ₹3-5k	Daily churn is quantity/priority 3-4×/day, not spec; greasy hands won't type name	Hindi, badge/barcode login, qty + partly-done tracking, machine/mould view
Delhi NCR	Vinod Aggarwal, laser-cutting job-work, Bawana, ~18	2	Curiosity; ≤₹500	"Order desk bhi main, approver bhi main" — one person all roles; WhatsApp free	One-person mode, jobs from WhatsApp, DXF/photo, Hindi
Chandigarh	Karan Bedi, 2nd-gen MD LT control panels, Phase II, ~35	7	Yes; ₹3-5k annual GST	Can't attach revised SLD/drawing	PDF/drawing attachments, WhatsApp alert to foreman, Zoho/Tally later
J&K	Showkat Ahmad Mir, pashmina/carpet exporter, Srinagar, ~25 + 200 home artisans	2	No	Floor is people's homes; jobs run months; internet off for days	Offline contractor phone app, Urdu, design photos

Quotes: Gurpreet: "Changa hai ji… mere karigar English nahin padhde. Badlaav main aap karda haan, phone te." Arjun: "Exactly our sampling-to-bulk headache… half a solution without rev C of the logo." Rakesh: "IATF auditor ko yeh achha lagega… double entry koi nahi karega." Sunil: "Aadha kaam bahar job-worker ke yahan hota hai." Neha: "Pharma-style thinking, achha laga." Mohan: "Hamara change quantity aur priority ka hota hai, din mein 3-4 baar… badge scan karo." Vinod: "Yeh bade logon ke liye hai." Karan: "Honestly, this fits us… that's the argument I have with my wiring foreman every month." Showkat: "Hamara floor ghar mein hai, janaab."

Patterns: strongest in custom/ETO work with multi-week cycles and document-based changes (drawings, SLDs, artwork, ECNs); exporters + compliance suppliers value the permanent log. Weakest: micro one-person units, high-volume schedule-driven shops (change = qty/priority), home-based artisan networks. Changes rarely a line of text — photo/PDF/drawing via phone/WhatsApp to owner who is also approver.

Top requests: versioned attachments (8/9); Hindi/Punjabi/Urdu floor (8/9); WhatsApp alerts/job creation (4); Tally/Zoho/ERP/email import (3); structured fields + flexible stages (qty, size split, part no.+rev, partly-done, custom stages

incl. job-workers) (4). Once: badge login, PDF log export.

Price: most ₹1-6k; compliance plants ₹8-15k only with attachments + integration; micro/artisan nothing. Flat per plant, annual upfront GST like Tally renewal; some UPI autopay monthly.

Floor: Hindi Devanagari, Punjabi Gurmukhi, Urdu; codes stay English; cheap Android tablet or existing LED TV + Android stick; supervisor phone; badge/barcode; inverter backup, Jio/Airtel hotspot.

Biggest reason not to adopt: changes arrive as phone call/WhatsApp photo to owner-approver; WhatsApp free; English text-only board needing retyping gets bypassed.

India West (Gujarat, Maharashtra, Rajasthan, Goa, DNH&DD) — 10 personas

State	Persona	Fit	Pilot / pay per month	Top objection	Must-have
Gujarat	Hitesh Vaghasiya, CNC turned parts for diesel engine/pump makers, Aji GIDC Rajkot, ~45	6	Yes if set up; ≤₹1.5k yearly like Tally	Can't attach drawing; English-only; supervisor won't type name 20×/day	PDF/photo drawing, Gujarati/Hindi, WhatsApp alert on change
Gujarat	Ketan Kundariya, 2nd-gen MD vitrified tiles, Morbi, ~280	4	Maybe packing/dispatch; ₹3-5k if saves one container delay	Process industry — kiln runs 24h on one design; nobody "marks done" a job	Dispatch/Packing dept, box-artwork photo, ERP order no., Hindi for migrant packers
Gujarat	Jignesh Desai, embroidery/digital print job-work, Sachin GIDC Surat, ~60	2	No; ≤₹500 if inside WhatsApp	Everything runs on photos + voice notes; approval step slows trader; Odia karigars	WhatsApp order intake, photo-first cards, Hindi/Odia
Maharashtra	Sachin Kulkarni, prod mgr Tier-2 pressing/welding, Chakan Pune, ~220	5	Yes one line if no IT approval; ₹8-12k only with ERP	ECN register + ERP exist; double entry; real daily pain = schedule/qty changes	ERP import, drawing rev attachment, flagged date/qty changes, Marathi/Hindi
Maharashtra	Shrikant Patil, grey/SG castings, Shiroli Kolhapur, ~90	3	Maybe office only; ₹1-1.5k	"Foundry madhe TV?" dust/heat; moulders don't touch screens; all changes via owner	Marathi, printed job slip w/ barcode instead of screen, cheap Android
Maharashtra	Imran Ansari, floor supervisor garment job-work, Bhiwandi, ~40	4	Wants it; "Seth ₹500 se zyada nahi dega"	No Hindi, no tech-pack photos; merchandiser won't log in	Hindi, photos, forward WhatsApp as change request
Rajasthan	Amit Agarwal, 2nd-gen MD rubber/plastic moulding for 2W OEMs, Bhiwadi, ~150	6	Yes two depts; ₹4-6k annual GST	Changes are "kal 2,000 nahi 3,500 bhejo" — qty/date not separate fields; no Tally/ERP	Qty + date fields w/ change flags, Hindi, shift view, ERP import
Rajasthan	Rohit Bhandari, wood/iron furniture exporter, Basni Jodhpur, ~120	6	Yes; ₹3-5k, ideally only in export season	No photos; English; one order = 40 SKUs in one text box	Photo/PDF attachments, Hindi, line items per SKU
Goa	Savio Fernandes, prod mgr contract pharma, Verna, ~180	2	Order desk only, never GMP floor; won't pay	Shared tablet typed name — inspector would tear it apart	Individual login + e-signature, validation docs, artwork attachments
DNH&DD	Neha Jain, 2nd-gen director flexible packaging, Masat Silvassa, ~85 (office Mumbai)	7	Yes straight away; ₹5-8k annual upfront GST	Can't attach artwork proof; operators need Hindi	Versioned PDF, Hindi floor, WhatsApp alert to plant head, job/cylinder no. field

Quotes: Hitesh: "Concept saras chhe… where is the drawing? Without it just a notice board." Ketan: "Amaru kaam order-wise nathi chaltu." Jignesh: "Amaru badhu photo par chale chhe." Sachin: "Auditor will like the activity log… won't do double entry." Shrikant: "Foundry madhe TV lavaycha?" Imran: "I'd finally have proof of when a change came." Amit: "Shift supervisors always swear they never got the message." Rohit: "Yeh hamara sabse bada dard hai." Savio: "Your before/after view is nicer than our change-control form… inspector would tear that apart." Neha: "Wrong artwork = whole roll scrap, lakhs gone; locked Mark done is exactly the check between Mumbai office and plant."

Patterns: strongest in made-to-order where one missed change wastes a lot/container (packaging, export furniture, precision parts, auto schedules) and where office and plant are in different cities (Mumbai→Silvassa, Delhi→Bhiwadi). Weakest: process industries (ceramics), regulated change control (pharma, partly Chakan), WhatsApp trader markets (Surat), harsh owner-centric floors (foundry). Free-text job card poor match — changes are photos, drawings, quantities, dates.

Top requests: Hindi/regional floor (Gujarati, Marathi, Odia) (9/10); versioned photo/PDF/drawing attachments (8/10); separate qty/date/line-item/job-no. fields with change flags (4/10); WhatsApp alerts/intake (4/10); Tally/ERP import (3/10). Once each: Dispatch/Packing dept, printed job slip, individual login + e-signature.

Price: ₹0-12k; most ₹1.5-6k per plant; flat per plant annual upfront like Tally licence, GST, NEFT/UPI; no per-user; exporters want season-only billing; Chakan's ₹8-12k needs ERP.

Floor: Hindi everywhere (migrant), Gujarati, Marathi, Odia; cheap Android (supervisor phone as shared screen); 32-43" TV/tablet only in clean areas; printed slip + barcode for harsh floors; pick-from-list or badge scan instead of typing name.

Biggest reason not to adopt: changes move as WhatsApp photos/drawings/voice notes in Hindi/Gujarati; English text-only board = re-typing, floor can't read it.

India South (TN, Karnataka, Telangana, AP, Kerala, Puducherry) — 10 personas

State	Persona	Fit	Pilot / pay per month	Top objection	Must-have
TN	Senthil Kumar, 2nd-gen MD, submersible pumps/motors, SIDCO Kurichi Coimbatore, ~120	6	Yes; ₹2-2.5k	Orders arrive on WhatsApp — someone must re-type; fitters won't type English	WhatsApp intake/alerts, Tamil floor labels, Tally export
TN	Kavitha Balasubramanian, merchandising head, Tiruppur knitwear exporter, ~450 + job workers	4	Maybe one buyer; ₹5k only if job workers covered	Too coarse for apparel (6 colours × 5 sizes in one text box); no tech-pack/photo; real problem at outside dyeing unit	Style/PO/colour-size grid, attachments, external job-worker access, Hindi/Odia
TN	Murugesan P., shift supervisor, Hosur Tier-2 auto (two-wheeler OEMs), ~180	6	Pushes for it; mgmt guess ₹3-5k after ERP sync	No drawing rev field/attachment; typed name not acceptable for IATF	Drawing rev + attachments, badge-scan operator ID, Tamil+Hindi, oil-proof enclosure
Karnataka	Raghavendra Rao, owner precision CNC job shop, Peenya Bengaluru, ~35	3	Maybe curiosity; ≤₹1k	"Swalpa overkill" — he is all three roles	Drawing attachments, customer-facing status link (stop "where is my part" calls), Tally
Karnataka	Aditya Kulkarni, 2nd-gen MD, grey/SG iron foundry, Udyambag Belagavi, ~220	5	Yes machining first; ₹4-6k	Fixed 3 departments can't model pattern→moulding→melting→fettling→machining→QA; no ERP link	Custom departments/stages, ERP/Excel import, Marathi + Kannada
Telangana	Dr. Srinivas Reddy, prod mgr, contract pharma formulation, Jeedimetla Hyderabad, ~150	2	Only maintenance/packaging requests; no pay	Shared tablet + typed name fails GMP data integrity (ALCOA+, 21 CFR Part 11/Annex 11)	Unique logins, e-signatures, IQ/OQ validation pack, QA approval gate
Telangana	Venkatesh Goud, AS9100 aerospace/defence machining, Balanagar, ~60	4	Only on-prem trial; one-time licence ₹1-1.5 lakh	Cloud — customer won't allow drawing data off premises; named-user auth	On-prem/LAN version, individual logins, attachments for revision/concession docs
AP	Suresh Babu K., ops head, fabrication/machining, Autonagar Visakhapatnam, ~80	6	Yes; ₹2.5k	Half changes are photos of sketches; "Urgent" not enough for breakdown jobs	Photo/sketch attachments, "Breakdown" priority, Telugu, WhatsApp alerts to site engineer
Kerala	Joseph Mathew, moulded rubber (gaskets/O-rings), Edayar Kochi, ~18	2	No	Irrelevant at his scale; Bengali/Assamese migrant floor	WhatsApp-native, even then probably no
Puducherry	Karthikeyan S., production in-charge, LT electrical panels (MCC/APFC), ~90	7	Yes immediately; ₹2-3k	No GA drawing attachment; must re-type change from email	Drawing attachment w/ rev no., email forwarding into a request, Tamil floor

Quotes: Senthil: "Concept nalla irukku. Last month 40 pumps went out with wrong nameplate because the chit was not updated." Murugesan: "Old-revision drawing on the machine is my biggest headache." Raghavendra: "Swalpa overkill… who will I acknowledge to, myself?" Srinivas: "An auditor will write a 483 on that." Venkatesh: "Audit trail with old and new text is

exactly what an AS9100 auditor asks for. But cloud?" Suresh: "Baagundi... half my changes are a photo." Joseph: "Ithokke namukku entha?" Karthikeyan: "This is my exact pain. If wiring team must acknowledge before 'done', the blame game stops."

Patterns: strongest in made-to-order engineering 50-200 people with separate floor team (panel building, pumps, auto Tier-2, fabrication). Weakest in <35-person units and regulated plants (pharma, defence) where shared/cloud/typed-name breaks compliance. Apparel has most change volume but data model doesn't fit (size-colour grids, outside job workers).

Top requests: attachments w/ revision (8/10); local language floor (Tamil, Telugu, Kannada, Malayalam, Marathi + Hindi/Bengali/Odia for migrants) (7/10); WhatsApp intake + alerts (6/10); Tally/ERP/Excel (5/10); configurable departments/stages/priorities + badge-scan ID (4-5 each).

Price: ₹0-6k/plant/mo; typical ₹2-3k for 50-200 people; flat per plant, annual upfront w/ GST via NEFT/UPI, discount for annual, free pilot 2-3 months; defence one-time on-prem ₹1-1.5 lakh; pharma/micro nothing.

Floor: icons/colours/large numbers > text; ₹10-15k Android tablets or existing TV + Android stick in oil/dust-proof enclosure; supervisors' phones; badge/barcode scan.

Biggest reason not to adopt: changes travel as WhatsApp voice notes, sketch photos, emailed drawings; floor not in English → tool becomes an extra channel to re-type into.

India Central (UP, MP, Chhattisgarh, Bihar) — 8 personas

State	Persona	Fit	Pilot / pay per month	Top objection	Must-have
UP	Rakesh Agarwal, MD garment export house, Noida, ~400	6	Yes; ₹6-8k if ERP-linked	No attachments; no size×colour breakdown	Tech-pack/trim photo attachments + PO import from garment ERP
UP	Imran Qureshi, owner saddlery/equestrian leather exporter, Kanpur, ~80	6	Yes; ₹3-4k (yearly w/ discount)	Colour change needs photo/swatch not text	Photo attachment + Hindi floor screen
UP	Satish Varshney, padlocks/hardware, Aligarh, ~25 + job workers	2	Demo maybe; ≤₹500	Half process outsourced to platers not on system	WhatsApp changes to job workers
MP	Vivek Joshi, prod mgr auto components, Pithampur, ~220	5	Yes one cell; ₹5-10k if tied to ERP work order	Second system next to ERP = double entry	ERP link (WO no.), drawing rev field, shift-wise ack
MP	Anil Tiwari, fabrication/machining job shop, Mandideep, ~45	5	Yes; ₹2-3k	No drawing upload / revision number	PDF/photo attachment w/ revision, viewable on phone
Chhattisgarh	Manoj Sahu, structural/plant-maintenance fabrication, Urla Raipur, ~90	5	Yes on supervisors' phones; ₹1.5-2.5k	Shared floor TV doesn't survive dust/heat/sparks; half work at client site	Mobile-first, Hindi, weak 4G, drawing photo
Bihar	Ritesh Kumar, makhana/namkeen packing, Hajipur, ~60	3	Free pilot maybe; ₹500-1k	Power cuts, patchy internet, no Hindi; changes rare (pouch/MRP)	Hindi, cheap Android, fully offline
UP	Ramesh Pal, floor supervisor sports goods, Meerut, ~120, class 8	3	n/a (owner decides)	Typing name in English; full-sentence diff hides the one number that changed (40→42)	Hindi, icons, highlight only changed word, badge scan

Quotes: Rakesh: "Concept sahi hai. Half my rejections are 'old label lag gaya'." Imran: "Thread colour badalta hai, aur stitching wale ko pata nahi chalta." Satish: "Mera floor mera aangan hai… yeh bade logon ka kaam hai." Vivek: "Engineering changes already controlled by QMS; informal changes are the gap; ack log would look good in a customer audit." Anil: "My 'requirement details' is a drawing, not a sentence. Without attachment it is half a product." Manoj: "Dhool, garmi, welding spark — TV won't last a month. Phone pe chale toh baat bane." Ritesh: "This is for engineering companies." Ramesh: "Pila dabba dikha toh samajh gaya kuch badla hai. Lekin angrezi mein lamba likha hai… bas jo badla wahi dikhao."

Patterns: strongest in export job-order businesses (garments, saddlery — changes from foreign buyers, late, pass 2-3 people) and drawing-based engineering job shops. Weakest in owner-on-floor micro units (Aligarh, Hajipur) where the owner's voice is the tracker and job workers are outside. IATF/ERP plants see it as add-on (informal changes + audit log).

Top requests: Hindi/Hinglish floor UI (6/8); photo/drawing/tech-pack attachments with revision (5/8); mobile-first offline-tolerant floor view instead of shared TV (4/8); WhatsApp alerts incl. outside job workers (3/8); ERP/Tally link (3/8). Also: highlight only changed word, badge scan, structured size-colour/qty fields.

Price: ₹1.5-4k small/mid; ₹5-10k for 200+ plants with ERP link; micro ₹0-1k. Flat per factory, annual with discount, free pilot first.

Floor: Hindi Devanagari, icons/colours; cheap Android (₹8-15k) and supervisors' phones over TVs; patchy 4G, power cuts.

Biggest reason not to adopt: changes live on WhatsApp + owner's voice and floor reads Hindi — without Hindi, attachments, WhatsApp it's one more screen nobody looks at.

India East (West Bengal, Odisha, Jharkhand) — 7 personas

State	Persona	Fit	Pilot / pay per month	Top objection	Must-have
WB	Subrata Pal, 2nd-gen MD, grey iron castings + railway parts, Liluah Howrah, ~85	5	Pilot office side; ≤₹1.5k	"Moulders won't touch a tablet; foreman is the screen"; railway amendments are formal letters, pain is private customers' phone changes to his father	Bengali/Hindi floor screen; pattern/drawing photos
WB	Farhan Qureshi, prod & merchandising head, export leather goods, Bantala Kolkata, ~220	7	Yes immediately (one buyer); ₹4-6k	"Leather is visual, text is not enough" — no tech-pack/photo attachments	Image/PDF attachments, style no. + colourway fields, Hindi/Urdu labels
WB	Anirban Chatterjee, floor supervisor, machine shop spares for steel plants, Durgapur, ~45	5	Yes if owner agrees; owner ~₹1k	Orders start as owner's 11pm phone call — he won't type into a website	Enter/edit from owner's phone <1 min (voice/WhatsApp forward), Bengali kiosk
Odisha	Prasanta Sahu, structural fabrication + shutdown maintenance contractor, Jharsuguda, ~150 contract labour	5	Maybe (phones at site); ₹2-3k if audit log wins billing disputes	Work is at client site, no floor screen; change comes from client's engineer (WhatsApp voice notes); payments held 60-120 days over "who approved"	Phone-only floor mode; log change in client engineer's name; PDF export of change history for bills
Odisha	Bijay Mohanty, CNC job shop, Mancheswar Bhubaneswar, ~14	2	No	"Coordinator, Authorizer, Logistics — all three are me"	Job-card printing + Tally invoice link might change mind
Jharkhand	Ritika Agarwal, 2nd-gen MD, Tier-2 auto pressings, Adityapur Jamshedpur, ~300	6	Yes one press line; ₹8-12k after ERP integration	Spec changes already via IATF ECN; real mess = schedule/qty/date changes on WhatsApp after plan frozen; no ERP, rev nos., drawings — auditor asks which document controls the job	ERP/Excel import, drawing rev + attachments, qty/date structured fields, Hindi kiosk ("lite ECN for shop floor")
Jharkhand	Sanjay Mahato, prod mgr, heavy fabrication (conveyor pulleys/idlers) for coal/steel PSUs, Tupudana Ranchi, ~60	4	Yes with setup help; ₹1.5-2.5k annual upfront with GST bill	Changes are pen marks on drawings; no scanners; duplicates WhatsApp group	Photo/drawing attachments, Hindi, cheap Android TV/old PC in dusty bay

Patterns: strongest where customers revise specs/schedules after approval and floor works from printouts (export leather, auto Tier-2). Weakest in tiny owner-run shops and PSU/government work (formal amendment letters). In steel/fabrication clusters the change starts outside the office (client engineer or owner phone/WhatsApp voice note) so office data entry misses it.

Top requests: attachments (5); Hindi/Bengali/Odia floor (5); fast phone/WhatsApp/voice entry (3); Tally/ERP/Excel (2-3); structured qty/date/revision + PDF change-history export (2-3).

Price: ₹0-12k; most ₹1-4k; >₹8k only 300-person auto with ERP. Annual upfront with GST invoice or flat per plant; per-user disliked; nobody pays before pilot proves it.

Floor: Hindi (migrant labour), Bengali, Odia, some Urdu; supervisors' cheap Android, old PCs/Android TV in dusty bays; tablets rare; scanners absent; patchy network in client plants.

Biggest reason not to adopt: changes travel as WhatsApp, phone calls and marked-up drawings; product only takes typed English office text → change never enters the system.

India North-East (all 8 states) — 9 personas

State	Persona	Fit	Pilot / pay per month	Top objection	Must-have
Assam	Dipankar Kalita, structural fabrication (tea-garden, OIL/ONGC contractor jobs), Bamunimaidan Guwahati, ~28	6	Yes; ₹1-1.5k yearly UPI + GST	No drawing/photo attachments	PDF/photo drawing, WhatsApp alert to supervisor, Assamese/Hindi floor labels
Assam	Rupjyoti Gogoi, factory mgr CTC/orthodox tea, near Dibrugarh, ~120 + seasonal	4	Yes packing room; ₹1.5-2.5k, HO approval	Tea runs on lots/grades not requests; no lot/grade/chest fields, no Tally; dust/humidity/power cuts	Lot/invoice fields, Assamese/Hindi (Sadri), patchy 4G resilience
Meghalaya	Wanphrang Nongrum, commercial/dispatch mgr ferro-silicon, Byrnihat, ~150	2	Maybe dispatch; no pay	Process plant — "the furnace doesn't read tickets"	Dispatch-order view tied to invoices/truck nos., Tally/ERP
Tripura	Partha Bhowmik, rubber products (tread rubber, mats), Bodhjungnagar, ~35	5	Yes; ₹500-800	English; no batch/compound fields	Bengali UI, sample photo on job card, SMS/WhatsApp alert (TV off in power cuts)
Manipur	Thoibi Devi, handloom (custom stoles/phanek), Imphal East, 12 looms + ~40 home weavers	2	No	No floor (home weavers); months-long internet shutdown (2023)	Photo-first orders, WhatsApp, Manipuri, offline on cheap Android
Mizoram	Lalrinfela Hnamte, chilli/ginger processing, Aizawl, ~15	2	Maybe curiosity; ≤₹300	Too much process for 15 people in one room (English fine)	Label/artwork image on card, one-phone owner mode
Nagaland	Vikato Zhimomi, steel fabricators, Dimapur, ~18 migrant fitters	4	Yes; ₹500-1k, yearly when cash comes	Fitters can't read English; no sketch photo; likes log as proof in contractor disputes	Hindi, sketch photo, change log PDF export to show contractor
Arunachal	Tage Rinya, kiwi/plum squash, Ziro, 9 seasonal	1	No	Irrelevant at size; no signal	Nothing; maybe a simple distributor order book
Sikkim	Karma Bhutia, PPC exec contract pharma, Rangpo-Majitar, ~200	3	Non-GMP order desk/dispatch only; corporate decides	No validation, e-signature, GMP compliance	Validation docs, e-signatures, role logins, on-prem/India hosting

Patterns: strongest in made-to-order job shops with separate office and floor where spec changes mid-job (Guwahati/Dimapur fabrication, Tripura rubber compounding); owners liked struck-out spec + log as proof in contractor disputes. Weakest: process (ferro-alloy, tea except packing), artisan/home-based (handloom), tiny seasonal owner-on-floor units. Most NE units small enough that owner's phone/WhatsApp carries every change. Pharma needs compliance-grade product.

Top requests: photo/drawing/artwork attachments (6); local-language floor (Assamese, Bengali, Hindi, Manipuri, Sadri) (5); WhatsApp/SMS alerts + entry (4); offline/low-bandwidth on cheap Android surviving power cuts (4); industry fields (lot/grade/batch/compound, dispatch/truck) + Tally/ERP (4). Once: PDF change-log export, validation/e-signature.

Price: ~₹500-2.5k, clustered ~₹1k; 5 of 9 pay nothing; yearly upfront UPI/NEFT + GST timed to seasonal cash (tea season, govt/contractor payments); larger units need HO/corporate IT approval.

Floor: Assamese, Bengali, Hindi (lingua franca for migrants), Nagamese, Manipuri, Sadri, Khasi, Nepali (English fine mainly in Mizoram); cheap Android phones; tablets need dust/humidity protection + inverter/UPS + tolerance for long outages (Manipur shutdowns).

Biggest reason not to adopt: most NE units too small / process / home-based / owner-on-floor where a WhatsApp call carries every change; English-only, cloud-only, no-photo tool doesn't fit multilingual floors with frequent power and internet loss.

Global: Americas & Europe — 9 personas (product-only, minimal brief)

Country	Persona	Fit	Pilot / pay per month	Top objection	Must-have
UK	Gareth Price, MD subcontract CNC aerospace/motorsport, Coventry, 45 (AS9100)	7	Yes; £100-200 flat, direct debit	No drawing attachments/rev field; anyone can type a name	Attachments w/ rev control, badge-scan ack, CSV audit export
US	Dale Kowalczyk, owner job shop (sheet metal/weldments/CNC), Akron OH, 38	6	Yes; $150-250 flat	One more screen next to JobBOSS — double typing; "my guys build from the print, not a sentence"	Drawing PDF w/ rev letters + JobBOSS import/CSV
Poland	Tomasz Wiśniewski, prod director, contract mfr welded frames for DE/NL OEMs, Wrocław, 160	6	Yes; PLN 600-1,200, faktura VAT/KSeF	English-only; no Comarch link	Polish (+German office), attachments, EU hosting; ideally change from customer email
US	Rosa Delgado, 2nd-shift floor supervisor, same Ohio shop	6	Pushes owner	Typing name on TV with gloves; half welders read Spanish	Badge scan, Spanish, big-font TV mode; cross-shift changes missed weekly
Brazil	Marcos Bertolini, owner metal parts for ag/truck OEMs, Diadema SP, 65	5	Yes; R$300-600 via boleto/Pix, NF-e	Duplicates Protheus; English; no WhatsApp	Portuguese, WhatsApp link to ack, photo/PDF
Italy	Giovanni Zanon, custom furniture/contract fit-out, Treviso, 30	5	Maybe; €50-120 annual via SDI	English-only, no photos; WhatsApp faster	Italian, photo attachments, WhatsApp notifications
Mexico	Alejandro Garza, plant mgr Tier-2 auto stampings, Querétaro, 210	4	Yes if Spanish; MXN 3-6k + CFDI	No Spanish, no WhatsApp, no link to customer releases/ERP; formal changes already under IATF	Spanish, WhatsApp notifications, shift field
Germany	Dr. Katrin Hölzl, GF special machine builder, near Augsburg, 120	3	Maybe if GDPR/EU hosting; €150-400 annual	Changes are BOM-level not text; typed names → Betriebsrat monitoring issue; no AVV/EU hosting/ERP-PDM	German UI, EU hosting + AVV, structured fields + attachments, ERP interface
US	Priya Raman, VP Ops, medical/aerospace contract mfr, Minneapolis, 140	3	Probably no; $800-1,500 only if validated	Shared tablet typed name fails auditors (Part 11); no ITAR/SOC2 story; QMS (MasterControl) + Epicor already cover	Per-user/badge e-signature, ERP integration, validation pack

Patterns: strongest in small high-mix job shops (10-80) on paper travelers + email/WhatsApp where revisions land mid-job. Weakest in regulated/ERP-mature plants (medical, aerospace at scale, IATF auto, German special machinery) — need structured BOM/drawing control. Everyone liked the lock + strikethrough diff; nobody disputed the core idea.

Top requests: attachments w/ revision letters (7/9); local language (6/9); ERP/job system link or CSV (5/9); WhatsApp notifications (LatAm, Italy) (3/9); badge/per-user identity (3/9); EU hosting + DPA (2).

Price: ~$100-250/mo equivalent small shops (£100-200, €50-400, PLN 600-1,200, R$300-600, MXN 3-6k); regulated $800-1,500 only with validation. Flat per site preferred; Europe annual invoice via national e-invoicing (SDI, KSeF); LatAm local invoices (CFDI, NF-e) + Pix/boleto.

Floor: Spanish, Portuguese, German, Polish, Italian (English alone only works in UK); wall TV/rugged tablet, glove-friendly buttons, badge/barcode, Android phones; WhatsApp as alert channel in LatAm/Italy.

Biggest reason not to adopt: second place to type every order beside ERP/paper traveler, carrying the change as free text with no drawing/revision/BOM.

Global: Asia, Middle East & Africa — 8 personas (product-only, minimal brief)

Country	Persona	Fit	Pilot / pay per month	Top objection	Must-have
Kenya	Wanjiru Kamau, flexible packaging, Nairobi Industrial Area, ~90	6	Yes; KES 5-8k via M-Pesa Paybill	Every WhatsApp change copied by hand; clients never log in (English fine)	Artwork attachment, WhatsApp in/out, cheap Android through power/data drops
Bangladesh	Rafiqul Islam, trims & packaging (labels, hangtags, cartons), Gazipur, ~220	6	Yes; ৳4-6k via bKash/bank	No artwork/tech-pack attachments; floor reads Bangla (40,000 care labels with old fibre composition → chargeback)	Bangla floor, versioned artwork upload, size/colour qty grid
UAE	Rajesh Menon, ops director skids & structural steel for EPCs, Jebel Ali/Sharjah, ~140	5	Yes one project; AED 750-1,500/site, more if it builds variation-order backup	No drawing attachments/rev numbers; free text can't describe a skid change	Drawing upload w/ rev control, variation/cost-impact field, multiple yards, Hindi/Urdu labels, claims export
South Africa	Pieter van Wyk, plant mgr pressed/welded parts, Tier-2 to VW Tier-1, Kariega, ~200	5	Yes one line; R2.5-5k EFT	No Syspro link; parallel to ECN system	Syspro import, part no./drawing rev fields, shift-handover ack, UPS for load-shedding
Vietnam	Nguyễn Thị Lan, plant mgr plastic injection/sub-assembly, Tier-2 for Korean phone supplier, Bắc Ninh, ~180	4	Maybe; ₫1.5-2.5M only with Vietnamese + Zalo	Zalo already reaches everyone instantly	Vietnamese UI, part no. + drawing rev fields, Zalo notifications
Thailand	Somchai Wattanakul, prod mgr stamping for JP-brand Tier-1s, Rayong, ~250	4	Pilot only if not touching IATF docs; ฿2-3.5k	Duplicates SAP B1 + formal ECN; only informal LINE changes left	Thai floor, SAP B1 import, LINE notifications
Japan	Takahashi Kenji, CNC precision parts, Higashi-Osaka, ~28	3	Hesitant, needs 商工会議所/peer intro; ¥10-15k invoiced	No drawings, no Japanese, no track record ("if they disappear, what happens to my records?"); likes 指差し確認 fit	Japanese UI, drawing PDF w/ rev mark, printable traveller w/ barcode, data export
China	Chen Wei, contract mfr sheet-metal/cable assemblies, Dongguan, ~260	2	No; ≤¥300-500 if DingTalk + Kingdee	DingTalk/Feishu approval flows already do this free; overseas hosting slow/blocked	Chinese UI, China hosting, DingTalk/WeChat, Kingdee sync

Patterns: strongest in small informal export-facing shops (Bangladesh trims, Kenya packaging, UAE fab) — changes come from buyers via chat, nothing formal between office and floor. Weakest: IATF auto (Thailand, South Africa — formal ECN + ERP) and China (free approval tools). Everyone liked Mark done lock + permanent change log (winning arguments with buyers/auditors). Several noticed demo data is Indian (BHEL, Bharat Forge) → read as "Indian-market product".

Top requests: attachments w/ revision (7/8); local-language floor (Bangla, Vietnamese, Thai, Chinese, Japanese, Hindi/Urdu) (7/8); chat-app integration (WhatsApp, Zalo, LINE, DingTalk/WeChat) (5/8); ERP import (SAP B1, Syspro, Kingdee) (4/8); structured fields (part no., drawing rev, size/colour/qty grid, variation cost) (4/8).

Price: ~US$35-100/site/mo (৳4-6k, ₫1.5-2.5M, ฿2-3.5k, ¥10-15k JP, AED 750-1,500, KES 5-8k, R2.5-5k); China ¥300-500 or no. Monthly in local currency via local rails (bKash, M-Pesa, EFT, 請求書払い, bank transfer); per site not per user.

Floor: local languages (English enough only Kenya, South Africa, UAE supervisors); cheap Android tablet/wall TV, supervisors' phones; survive power cuts + patchy data (Kenya, SA, Bangladesh); Japan wants printed traveller with barcode.

Biggest reason not to adopt: changes arrive as a FILE through a CHAT APP and floor reads local language; English text-only board beside the chat app becomes a second place to update → abandoned within weeks.
